

Help!
My DTT reception is poor!

Is DTT available in the area?

Yes/maybe

Definitely not

Consider Freesat, or wait for the analogue switch-off

Is analogue reception pretty good?

Yes, it's perfect

No, it's snowy

Check the connections at the wall, and possibly replace the flylead

Problem solved!

Still no good

Repair or replace the aerial and cable (ensure correct types for DTT)

Problem solved!

Still not perfect

Fit a masthead amplifier with a gain figure of about 12dB.

Problem solved!

Still not perfect

Oh dear! You are probably in a localised DTT coverage gap. Sign up for Freesat or wait for analogue switch-off.

Is the aerial aligned on a non-DTT local relay transmitter?

No, it's on a main station or a DTT-capable local relay transmitter

Yes, alas

Install a suitable new aerial aligned on a DTT-capable transmitter and ideally a new double-screened cable

Problem solved!

Still not perfect

Does this particular transmitter require the use of a wideband aerial?

Yes

No

Fit a wideband aerial and ideally a new double screened cable

Problem solved!

Still not perfect
